Rawalpindi, Pakistan

Highly skilled Full-Stack and WordPress Developer with comprehensive experience engineering performance-focused business platforms using React, MERN stacks, Elementor, and Oxygen Builder. Proficient in custom UI implementation, WooCommerce workflows, and front-end optimization resulting in Lighthouse 90+ performance metrics. Possesses a strong understanding of modern JavaScript and scalable software architecture. Proven capacity to operate seamlessly within remote environments for US companies while proactively shipping clean structural code.

EXPERIENCE

WordPress Developer | Full-Stack Developer

09/2025 - Present

YourCompanyGo — Remote, United States

- Develop and optimize custom WordPress installations utilizing advanced component decoupling in Oxygen Builder and Elementor for high-speed corporate platforms.
- Configure architectural WooCommerce systems alongside multi-tier subscription workflows to maintain frictionless user access and purchasing paths.
- Successfully refactor complex corporate codebases, reducing latency through deep asset optimization and custom vanilla JavaScript handlers.
- Maintain critical client site updates, executing error debugging routines to guarantee high-availability deployments for US-based agency clients.

Field Network Engineer - Intern

05/2025 - 08/2025

Netkom Communications Technology LLC — Rawalpindi, Pakistan

- Installed Huawei rack server units and mapped fiber optic distribution loops at the Zong Tier-3 Data Center network layer.
- Assisted with port interface alignment planning, deep cabinet routing setups, and system-level baseline port monitoring tasks.
- Deployed ATN and QC terminal physical hardware matrices across 6 active regional telecom towers on accelerated field timelines.

TECHNICAL PROJECTS

Medhub.pk

2026

Pharmaceutical E-Commerce Platform

- Architected the complete front-end structure and UI for a complex pharmaceutical subscription site using Oxygen Builder.
- Coded responsive custom layout styling, resolved critical SSL protocol errors, and engineered custom sticky navigation components.

Oncocare Systems

2026

Oncology Architecture

- Developed a comprehensive scalable architecture for a specialty medicine platform, featuring robust content management structures.
- Designed and integrated an automated WhatsApp ordering system to streamline patient fulfillment timelines and communications.

CloseMinded Philosophy

2026

Restricted Content Access System

- Engineered secure user access restriction walls utilizing conditional logic and advanced WooCommerce membership role mapping.
- Implemented strict server-side URL path redirection mechanisms to entirely prevent unauthorized content bypasses.

EDUCATION

BS Computer Science

Virtual University of Pakistan

2024 - Ongoing

3-Year Software Eng. Diploma

Aptech Educational Institute

2023 - 2026

CERTIFICATIONS

CS50 Certification

Harvard University (Ongoing)
